

MO MAAZ

Business Analyst – Mining & Operations

Riyadh, Saudi Arabia | +966 573218709 | maaz.eesa@yahoo.com | [LinkedIn](#) | [Portfolio](#)
Mine Planning | Production Analytics | Feasibility Support (NPV/IRR) | Power BI | SQL | Advanced Excel

PROFESSIONAL SUMMARY

Business Analyst with 4+ years of experience across open-pit gold mining operations, production planning, feasibility support, and executive reporting. Direct experience in mine production scheduling, bench sequencing, grade/recovery analysis, and feasibility inputs (NPV, IRR, sensitivity analysis), alongside Power BI/SQL-driven business intelligence and workforce analytics. Trusted by CFO, VP of Mining, and Chief Mining Engineer-level stakeholders for executive dashboards and decision-support reporting. Combines industrial operations exposure with strong data/BI capability to support planning, performance, and management reporting across technical, finance, and operations functions.

CAREER HIGHLIGHTS

- Supported multi-pit open-pit gold production scheduling, bench sequencing, ore/waste movement tracking, and monthly production planning aligned with processing capacity and gold targets.
- Contributed to feasibility and business-planning support through pit-wise summaries, production assumptions, grade/recovery analysis, cost inputs, NPV/IRR modelling inputs, and executive-level reporting packs.
- Built and delivered executive Power BI dashboards and KPI reports used directly by the CFO/Deputy CEO, VP of Mining, and Chief Mining Engineer for operational review and decision-making.
- Automated reporting workflows using Power BI, Advanced Excel, Power Query, Microsoft Forms, and OneDrive — improving daily visibility across production, drilling, and management reporting.
- Extended reporting and analytics capability into workforce/HR analytics (attendance reconciliation, payroll reporting) as secondary scope, without displacing core mine planning responsibilities.

SELECTED PROJECTS

- Multi-Pit Production Scheduling | Bench Sequencing, Ore/Waste Movement, Strip Ratio Review | Gold Operations | SGR
- Feasibility Study Support | Production Assumptions, Pit-Wise Summaries, NPV/IRR Inputs, Sensitivity Analysis | SGR
- Executive Business Intelligence Dashboards | Power BI, Excel Automation, KPI Reporting | CFO & Mining Leadership | SGR
- HL/CIL Feed Planning Support | Grade Thresholds, Recovery Assumptions, Crusher Feed, Stockpile Control | Gold Operations | SGR
- Attendance & HR Analytics Automation | JISR-BioTime Reconciliation, Payroll & Workforce Reporting | SGR

AREAS OF EXPERTISE

Mine Planning | Production Scheduling | Open-Pit Gold Operations | Bench Sequencing | Grade & Recovery Analysis | HL/CIL Feed Planning | Plan vs Actual Review | Feasibility Study Support (NPV/IRR) | Business Analytics | Business Intelligence | KPI Reporting | Dashboard Development | Power BI | SQL | Advanced Excel | Power Query | DAX | Stakeholder Management

PROFESSIONAL EXPERIENCE

Mine Planning & Production Support Analyst | Business Analytics

Saudi Gold Refinery Co. (SGR), Riyadh, Saudi Arabia | Sep 2024 – Present

- Support mine planning and production scheduling for open-pit gold operations, including monthly production plans, pit-wise summaries, bench sequencing, and ore/waste movement analysis.
- Assist with HL and CIL feed planning by reviewing grade ranges, recovery assumptions, processing capacity, crusher feed requirements, and ROM/stockpile movements.
- Support feasibility and business-planning workstreams through structured production data, cost/revenue inputs, sensitivity analysis, and NPV/IRR modelling inputs.
- Develop and maintain automated Power BI/Excel reporting systems, delivering executive dashboards used by the CFO, VP of Mining, and Chief Mining Engineer.
- Prepare plan-vs-actual performance reports covering production, drilling, grade, recovery, strip ratio, and operational KPIs for technical and executive review.
- Extend reporting capability to workforce analytics (attendance reconciliation, payroll reporting) supporting HR leadership as secondary scope.

Business Analyst & Data Team Lead

NovaVente | Home of Technology, Mumbai, India | Apr 2023 – Aug 2024

- Led reporting and analytics activities across business operations, sales performance, KPI tracking, and incentive reporting.
- Managed weekly MIS reports for 10–13 clients, ensuring 98% accuracy and timely delivery.
- Built automated Excel/Power BI reporting models, improving forecast accuracy by 15% and reporting efficiency by 20%.

- Coordinated with cross-functional teams to standardise reporting processes and improve operational visibility.

MIS Analyst | Operations & Inventory Analytics

Shree Balaji Exterior, Mumbai, India (Construction Industry) | Jun 2022 – Feb 2023

- Managed material, inventory, and project MIS across 13+ projects, ensuring accurate inventory tracking.
- Improved procurement efficiency by 15% and reduced resource-allocation time by 10% through consumption analysis.
- Contributed to a 7% reduction in material costs through structured reporting and vendor coordination.
- Maintained structured records and supported stakeholder communication to ensure timely project execution.

TECHNICAL TOOLKIT

Power BI | SQL | Advanced Excel | Power Query | DAX | Data Modelling | Pivot Tables | XLOOKUP | Microsoft Forms | Power Automate | OneDrive | SharePoint | Dashboard Design | KPI Reporting | Management Reporting Packs
